

# Managed Bill Pay

Reduce administrative burden and stay in control of your recurring technology invoices.

## Key Benefits

### Accurate, timely, efficient payments

Managed Bill Pay lets you outsource hundreds of vendor invoices and reduce them to one monthly payment for your accounts payable department to manage. As a trusted partner we take these time-consuming operational processes and simplify them, allowing you to avoid late payment fees and the hassle of misapplied payments.

### Reduce complexity

Managing your global technology spend can involve logging in to hundreds of vendor portals, creating inefficiencies and raising the risk of late payment fees. Calero-MDSL makes these payments on your behalf, reducing them down to one single monthly invoice for you; dramatically simplifying the challenges of managing your technology invoices.

### Alleviate administrative burden

Industry data estimates the average invoice costs \$25 to process, with additional admin costs being incurred should the invoice contain errors. With hundreds of bills to pay, this adds up to weeks or months of costly, distracting administrative time. Managed Bill Pay streamlines this process, providing one monthly consolidated invoice, eliminating your burden.

### Minimize time spend on misapplied or incorrect payments

With hundreds of global invoices to pay, Managed Bill Pay can help you reduce time spent on misapplied payments. As an industry leading expert, Calero-MDSL will engage with vendors on your behalf to make sure your payments are properly applied, eliminating fees and disconnects.

### Prevent vital services being shut off

Managed Bill Pay from Calero-MDSL connects directly to your vendors, ensuring that bills are paid on time and that your business critical services are uninterrupted.

### Full transparency

Individual invoices are visible in the Calero-MDSL platform at all times, keeping you informed and in control, eliminating the risk and cost of managing multiple vendor portals.

# Industry Proven Software

Managing an enterprise technology environment has too many moving parts to do it alone. Surviving on a patchwork of manual processes and software tools leads to wasted time and more importantly, wasted money. Stop surviving, start thriving.

Leverage an easy-to-use software platform and enable order management, usage analysis and ongoing expense management for your technology environment. Calero-MDSL solutions for technology span a wide range of applications that address pain points in managing a global enterprise communications estate.

## Expert Service Delivery

Insert Calero-MDSL service delivery to realize the full efficiency of our software platform. Our experts become an extension of your team providing basic managed services through full business process outsourcing (BPO) support across repetitive and one-time tasks.

We bring a unique mix of software and services to each client engagement that enable key functional areas to be managed across spend categories. Each solution is configured to drive desired client outcomes enabling visibility, process automation and cost reduction.
